- Consecutive or Simultaneous Interpretation
- Intuitive user interface
- Users control their own layout
- Encodes up to HD 720p@ 30fps
- Decodes up to 1440p
- Any participant can share content

Scalable Multipoint HD Video Conferencing Connection

The Remote Court Interpretation System allows the Judge and the Interpreter full control of the interpretation process, providing real-time video and audio connectivity to all participants involved in the proceedings.

Easy To Use Web-Based Control Interface

The Interpreter can mute the audio or video output for any connection. Private interpretation is accomplished with standard headphones.

Interpretation Becomes A Part Of The Record

The Remote Court Interpretation System provides an optional web based recording function that can be used as the primary or secondary digital record of the proceedings.

Built-In Investment Protection

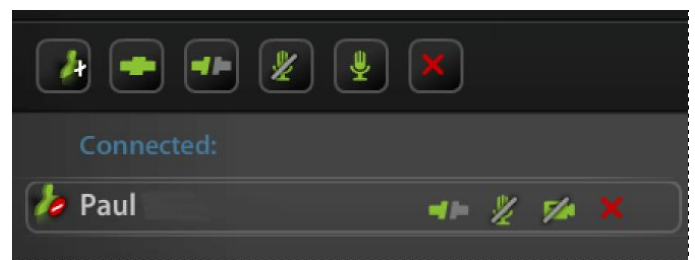

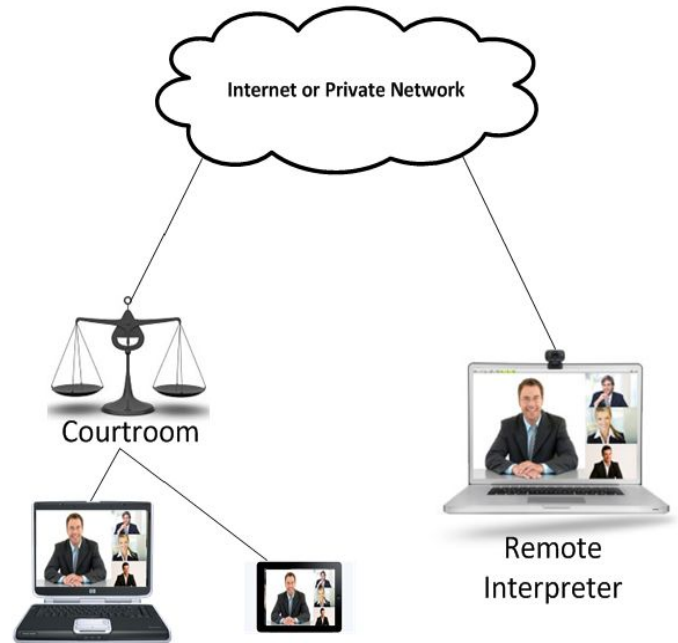

Allows for the incorporation of legacy video conferencing equipment such as Polycom, Sony, and Tandberg.

Private Council Interpretation

Confidential attorney/client conversations are controlled by the interpreter with a single-click. The interpreter can allow or block any participant from the session.

Simple Installation And Operation

The System offers tremendous flexibility. Interpreters or Interpreter Services can effectively be in different parts of the Nation providing improved accessibility and saving thousands of dollars in travel.
